Description of Hospital / Institution

In no more than 300 words please provide a brief description of your Hospital / Institution indicating issues such as bed numbers, geographical location and population served. Please type this section.

Leuven University Hospital Belgium

The +/- 1.656 beds at the University Hospitals of Leuven (UZ Leuven) make this the largest hospital in the country. Its 10.000 dedicated employees form the heart of campuses Gasthuisberg, Lubbeek, Pellenberg, and Sint Rafaël . The combination of their expertise and motivation guarantees optimum patient services.

The progressive infrastructure of the Gasthuisberg campus provides a fitting environment for high-tech medicine. This health centre was built using a revolutionary new concept. The walls were built around the functions, not vice versa. In this way, the building complex seamlessly integrates all medical and paramedical disciplines.

The Department of Urology consist of an outpatient clinic (daily consultation, functional service, a stone service and a radio-urological service), one urological wards for adult patients (18 beds), an urological ward for children, a daily hospital and two operating theatres every day.

The outpatient clinic activities are subdivided in different care programmes like paediatric urology. functional urology. uro-gynaecology and male infertility, uro-oncology, endo-urology, reconstructive urology. Each staff member is responsible for several care programmes.

Our hospital is also a training hospital for students of nursing and we value the opportunity to share learning with others.

If you want to join the fellowship programme we can offer you a programme where you can visit our different services.

We would like to meet you in Leuven and you are always welcome.
