

EAUNwebinar

Clinical strategies for reducing UTIs in intermittent catheterisation (IC): From the guideline to the bedside - smarter catheter care

10 December, 2025

19:00 – 20:00 CEST (18:00 – 19:00 GMT)

Learning objectives

After this webinar, participants will be able to:

- Describe the pathophysiology and risk factors for IC and UTIs
- Apply practical strategies to enhance patient safety and promote good patient outcomes
- Explain the principles and best practice of IC as a bladder management option

Programme

Moderators: E. Wallace, Dublin (IE)
T. Kelly, Galway (IE)

19:00 – 19:05 Introduction: objectives and audience poll
E. Wallace, Dublin (IE)
T. Kelly, Galway (IE)

19:05 – 19:20 Beyond the bladder: Anatomy, physiology and clinical impacts of UTIs
S. Lagat, Sydney (AU)

19:20 – 19:35 Prevention in practice: Turning best evidence into everyday infection control to prevent infections
V. Geng, Lobbach (DE)

19:35 – 19:50 Catheterisation made easy: Simplifying IC for teaching safer bladder care
S. Hillery, York (GB)

19:50 – 20:00 Q&A, key learning recap and audience poll
E. Wallace, Dublin (IE)
T. Kelly, Galway (IE)
